Section 2: Hazards Identification

Emergency Overview

Appearance & Odor: Amber liquid, petroleum odor

CAUTION

Flammable. Harmful or fatal if swallowed. Eye irritant. Contents under pressure.

As defined by OSHA's Hazard Communication Standard, this product is hazardous.

Potential Health Effects:

EYE: May cause moderate eye irritation.

SKIN: May cause skin irritation. Prolonged contact may allow material to be absorbed through the skin

INHALATION: May cause respiratory irritation. Overexposure to vapors may lead to central nervous system effects such as headache and drowsiness, followed by dizziness and nausea.

INGESTION: May cause gastrointestinal discomfort or irritation of the throat. Aspiration of this material into the lungs, either while swallowing or vomiting, may lead to chemical pneumonitis, which could be fatal. Signs of lung involvement include increased respiratory rate, increased heart rate, and a bluish discoloration of the skin.

CHRONIC EFFECTS: Repeated skin contact may cause contact dermatitis.

TARGET ORGANS: Central nervous system.

Medical Conditions Aggravated by Exposure:

pre-existing skin conditions

See Section 11 for toxicology and carcinogenicity information on product ingredients.

Section 3: Composition/Information on Ingredients

| COMPONENT | CAS NUMBER | % by Wt. |

Section 4: First Aid Measures

Eye Contact: Immediately flush with plenty of water for 15 minutes. Call a physician if irritation persists.

Skin Contact: Remove contaminated clothing and wash affected area with soap and water. Call a physician if irritation persists. Wash contaminated clothing prior to re-use.

Inhalation: Remove person to fresh air. Keep person calm. If not breathing, give artificial respiration. If breathing is difficult give oxygen. Call a physician.

Ingestion: Do NOT induce vomiting due to aspiration hazard. If vomiting occurs, lower head below knees to avoid aspiration. Seek immediate medical attention.

Note to Physicians: None

Section 5: Fire-Fighting Measures

Flammable Properties: This product is flammable in accordance with aerosol flammability definitions (16 CFR 1500.3(c) (6)).

| | | | |
|---------------------------|--------------|------------------------|----|
| Flash Point: | 177 F (PMCC) | Upper Explosive Limit: | ND |
| Autoignition Temperature: | ND | Lower Explosive Limit: | ND |

Suitable Extinguishing Media: Use extinguishers appropriate for a class B fire.

Products of Combustion: Oxides of carbon

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

Section 6: Accidental Release Measures

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Methods for Containment & Clean-up: Dike area to contain spill. Ventilate the area with fresh air. If in confined space or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

Section 7: Handling and Storage

Handling Procedures: Avoid breathing vapors. Use outside or with adequate ventilation. Avoid contact with eyes, skin and clothing. Do not use near sparks, open flames or other sources of ignition.

Storage Procedures: Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120 F to prevent cans from rupturing.

Aerosol Storage Level: III

Section 8: Exposure Controls/Personal Protection

Exposure Guidelines:

| COMPONENT | OSHA | | ACGIH | | OTHER | | UNIT |
|---|------|------|-------|-------|-------|--------|------|
| | TWA | STEL | TWA | STEL | TWA | SOURCE | |

| N.E. – Not Established (c) – ceiling (s) – skin (v) – vacated | | | | | | | |

Engineering Controls: Area should have ventilation to provide fresh air. Use local exhaust to prevent accumulation of vapors. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations

Respiratory Protection: None required for normal work where adequate ventilation is provided. Use NIOSH-approved self-contained positive pressure respirators in low circulation areas and for emergencies.

Eye/face Protection: For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

Skin Protection: Use protective gloves such as neoprene or nitrile. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.
