#### 2.3 Other hazards

#### · Results of PBT and vPvB assessment

· PBT: Not applicable.

· vPvB: Not applicable.

#### **Explosive Product Notice**

PREVENTION OF ACCIDENTS IN THE USE OF EXPLOSIVES - The prevention of accidents in the use of explosives is a result of careful planning and observance of the best known practices. The explosives user must remember that he is dealing with a powerful force and that various devices and methods have been developed to assist him in directing this force. He should realize that this force, if misdirected, may either kill or injure both him and his fellow workers.

WARNING - All explosives are dangerous and must be carefully handled and used following approved safety procedures either by or under the direction of competent, experienced persons in accordance with all applicable federal, state, and local laws, regulations, or ordinances. If you have any questions or doubts as to how to use any explosive product, DO NOT USE IT before consulting with your supervisor, or the manufacturer, if you do not have a supervisor. If your supervisor has any questions or doubts, he should consult the manufacturer before use.

## **3** Composition/information on ingredients

#### · 3.2 Mixtures

· Description: Mixture of substances listed below with nonhazardous additions.

#### · Dangerous components:

Ranges reflect weight of individual component when compared to toal weight of chemical substances in product, but does not include components not involved in chemical reactions, such as casings, fasteners, and other similar items.

## 4 First aid measures

#### · 4.1 Description of first aid measures

#### • General information:

Do not leave affected persons unattended.

Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

Remove breathing equipment only after contaminated clothing have been completely removed.

In case of irregular breathing or respiratory arrest provide artificial respiration.

#### • After inhalation:

Take affected persons into fresh air and keep quiet.

Supply fresh air or oxygen; call for doctor.

In case of unconsciousness place patient stably in side position for transportation.

• After skin contact: Immediately wash with water and soap and rinse thoroughly.

#### · After eye contact:

Remove contact lenses if worn.

Rinse opened eye for several minutes under running water. Then consult a doctor.

#### After swallowing:

Rinse out mouth and then drink plenty of water.

Do not induce vomiting; call for medical help immediately.

A person vomiting while laying on their back should be turned onto their side.

Call for a doctor immediately.

## 4.2 Most important symptoms and effects, both acute and delayed

No further relevant information available.

· Hazards Danger of impaired breathing.

(Contd. on page 6)

GHS

Printing date 30.05.2013

Revision: 15.04.2013

(Contd. of page 5)

• **4.3 Indication of any immediate medical attention and special treatment needed** No further relevant information available.

## **5** Firefighting measures

· 5.1 Extinguishing media

• Suitable extinguishing agents: CO2, sand, extinguishing powder. Do not use water.

- For safety reasons unsuitable extinguishing agents: Water with full jet
- 5.2 Special hazards arising from the substance or mixture
- Product may explode if burned in confined space. Individual cartridges may explode. Mass explosion of many cartridges at once is unlikely.

During heating or in case of fire poisonous gases are produced.

5.3 Advice for firefighters

## • Protective equipment:

Do not inhale explosion gases or combustion gases.

Wear self-contained respiratory protective device.

Wear fully protective suit.

Additional information In case of fire: Evacuate area. Fight fire remotely due to the risk of explosion.

## 6 Accidental release measures

· 6.1 Personal precautions, protective equipment and emergency procedures

Remove persons from danger area.

Ensure adequate ventilation

Protect from heat.

Keep away from ignition sources.

Wear protective equipment. Keep unprotected persons away.

• 6.2 Environmental precautions: Do not allow product to reach sewage system or any water course.

## 6.3 Methods and material for containment and cleaning up:

Pick up mechanically.

Send for recovery or disposal in suitable receptacles.

Dispose of the material collected according to regulations.

## 6.4 Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

## 7 Handling and storage

## • 7.1 Precautions for safe handling

Use only in well ventilated areas.

Take note of emission threshold.

Handle with care. Avoid jolting, friction and impact.

 $^{\rm \cdot}$  Information about fire - and explosion protection:

Keep ignition sources away - Do not smoke.

Protect from heat.

(Contd. on page 7)

GHS

Printing date 30.05.2013

Revision: 15.04.2013

#### Trade name: Defense Technology® 1687 and 1697 Series Fuze (M201A1)

(Contd. of page 6)

Protect against electrostatic charges. Keep respiratory protective device available. Emergency cooling must be available in case of nearby fire.

#### · 7.2 Conditions for safe storage, including any incompatibilities

· Storage:

• Requirements to be met by storerooms and receptacles: Store in a cool location.

#### Information about storage in one common storage facility:

Store away from flammable substances.

Do not store together with oxidizing and acidic materials.

Store away from foodstuffs.

## • Further information about storage conditions:

Protect from heat and direct sunlight.

Protect from humidity and water.

Store under lock and key and with access restricted to technical experts or their assistants only.

Store in a cool place.

· 7.3 Specific end use(s) No further relevant information available.

## 8 Exposure controls/personal protection

#### • Additional information about design of technical facilities: No further data; see item 7.

Possible in traces.

Toxic metal oxide smoke Bariumoxide vapour Leadoxide vapour Irritant gases/vapours Poisonous gases/vapours

## 11 Toxicological information

## · 11.1 Information on toxicological effects

· Acute toxicity:

· LD/LC50 values relevant for classification:

#### 7758-97-6 lead chromate

Oral LD50 12000 mg/kg (mouse)

## 7439-96-5 manganese

Oral LD50 9000 mg/kg (rat)

#### Primary irritant effect:

• on the skin: No irritant effect.

· on the eye: No irritating effect.

• Sensitization: No sensitizing effects known.

• Additional toxicological information:

Toxicological classifications are based on product ingredients without regard to overall form of product. In actual usage, hazards may be mitigated by solid non-inhalable form and subsequent placement of materials into protective canister. This does not remove the requirements for proper protective equipment as indicated in Section 8.

Product is suspected to cause birth defects.

Product is suspected to cause damage to fertility.

The product shows the following dangers according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version:

Toxic

Harmful

Carcinogenic.

Normal handling of the undeployed product poses little or no health hazards. One should avoid inhalation by wearing appropriate respiratory protection when exposed to the chemical ingredients of the product above listed TLV's or when exposed to the post ignition by-products. This product is a solid material which contains the various components within a metal shell. Therefore, under normal handling of this product, no exposure to any harmful materials will occur. When the product is used, particles may be generated which may be irritating to the eyes and the respiratory tract.

## **12 Ecological information** · 12.1 Toxicity · Aquatic toxicity: The product contains materials that are harmful to the environment. No data is available on this product, but leachates of metal components may be harmful or toxic to aquatic life and waterfowl. Collection and careful disposal of spent cartridges is highly advisable. Lead and chromium are especially problematic when introduced into many ecosystems. 12.2 Persistence and degradability The product is partially biodegradable. Significant residuals remain. • 12.3 Bioaccumulative potential May be accumulated in organism · 12.4 Mobility in soil No further relevant information available. · Ecotoxical effects: · Remark: Very toxic for fish · Additional ecological information: · General notes: Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water Do not allow product to reach ground water, water course or sewage system. Danger to drinking water if even small quantities leak into the ground. Also poisonous for fish and plankton in water bodies. Very toxic for aquatic organisms 12.5 Results of PBT and vPvB assessment · PBT: Not applicable. · vPvB: Not applicable. 12.6 Other adverse effects No further relevant information available. 13 Disposal considerations 13.1 Waste treatment methods Recommendation Can be burned with household garbage after consulting with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations. Damaged materials pose a danger to anyone in the immediate area: consult experts for disposal of damaged products.

#### · Uncleaned packaging:

· Recommendation: Disposal must be made according to official regulations.

## · Canadian Ingredient Disclosure list (limit 0.1%)

10294-40-3 barium chromate

7758-97-6 lead chromate

## · Canadian Ingredient Disclosure list (limit 1%)

7439-96-5 manganese

· National regulations:

#### · Information about limitation of use:

Workers are not allowed to be exposed to the hazardous carcinogenic materials contained in this preparation. Exceptions can be made by the authorities in certain cases.

#### · Other regulations, limitations and prohibitive regulations

• Substances of very high concern (SVHC) according to REACH, Article 57

7758-97-6 lead chromate

· 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

## **16 Other information**

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

#### Relevant phrases

- H200 Unstable explosives.
- H250 Catches fire spontaneously if exposed to air.
- H251 Self-heating: may catch fire.
- H260 In contact with water releases flammable gases which may ignite spontaneously.
- H271 May cause fire or explosion; strong oxidiser.
- H302 Harmful if swallowed.
- H332 Harmful if inhaled.
- H350 May cause cancer.
- H360Df May damage the unborn child. Suspected of damaging fertility.
- H373 May cause damage to organs through prolonged or repeated exposure.
- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long lasting effects.
- R1 Explosive when dry.
- R15 Contact with water liberates extremely flammable gases.
- R17 Spontaneously flammable in air.
- R20/22 Harmful by inhalation and if swallowed.
- R22 Harmful if swallowed.
- R3 Extreme risk of explosion by shock, friction, fire or other sources of ignition.
- R33 Danger of cumulative effects.
- R45 May cause cancer.
- R48 Danger of serious damage to health by prolonged exposure.
- R50/53 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. R61 May cause harm to the unborn child.
- R62 Possible risk of impaired fertility.
- R9 Explosive when mixed with combustible material.
