First aid measures for different exposure routes

General advice	Show this safety data sheet to the doctor in attendance.
Eye contact	Immediately flush eyes with water for a least 15 minutes while holding eyelids open. Get medical attention.
Skin contact	Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician, immediately. Wash clothing before re-use.
Inhalation	If qualified give oxygen or artificial respiration as needed.
Ingestion	DO NOT induce vomiting. Give large amounts of water if victim is conscious. Never give anything by mouth to an unconscious person. Get medical attention immediately.
Protection of First-aiders	Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.
Most important symptoms/effects,	acute and delayed
Main Symptoms	The most important known symptoms and effects are described in the labelling in section 2 and/or in section 11.
Indication of immediate medical at	tention and special treatment needed, if necessary
Notes to physician	Probable mucosal damage may contraindicate the use of gastric lavage.

 plants. Keep out of waterways. See Section 12 for additional Ecological Information.

 Methods and materials for containment and cleaning up

 Methods for Containment
 Dike to contain spill and prevent entry into sewers, waterways, and low areas. Neutralize with dilute acid. Prevent further leakage or spillage if safe to do so.

 Methods for cleaning up
 Neutralise with a weak acid. Small spills: Flush to sanitary sewer. Mop up residue and rinse area thoroughly with water.Large spills: Dike or dam spill. Pump to containers or soak up on inert absorbent. Flush residue to sanitary sewer. Flush with large quantity of water.
