2. HAZARDS IDENTIFICATION

Classification

Flammable solids	Category 2
------------------	------------

GHS Label elements, including precautionary statements for consumer products: NONE

OSHA 29 CFR 1910.1200 (b)(5) This section does not require labeling of the following chemicals: (b)(5)(v) Any consumer product or hazardous substance as those terms are defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) respectively, when subject to a consumer product safety standard or labeling requirement of those Acts, or regulations issued under those Acts by the Consumer Product Safety Commission,;

The Federal Hazardous Substances Act is implemented per CPSC 16 CFR 1500. And 16 CFR 1500.83 *Exemptions for small packages, minor hazards, and special circumstances.* 16 CFR 1500.83(a)(2) Common matches, including book matches, wooden matches, and so-called "safety" matches are exempt from labeling requirements of section 2(p)(1) of the act (repeated in §1500.3(b)(14)(i)) insofar as they apply to the product being considered hazardous because of being an "extremely flammable solid" or "flammable solid" as defined in §1500.3(c)(6)(v) and (vi).

Safety matches are regulated as a consumer product by the Consumer Products Safety Commission, 16 CFR 1202, *Safety Standard for Matchbooks*. This standard requires the following labeling and marking:

16 CFR § 1202.6 Marking. (a) The manufacturer's or private labeler's name and city or a symbol which will identify the name and city shall appear on the matchbook. In addition, every private labeler must label the matchbook with a code which enables it to identify, if requested, the manufacturer of the product. (b) Boxes or cartons in which two or more caddies are shipped shall be marked "For safety, store in a cool, dry place."

Precautionary Statements - Storage

Store in a cool, dry place

Precautionary Statements - Disposal

None

Hazards not otherwise classified (HNOC)

Smoke from fire may be irritating to lungs and eyes.

Unknown Toxicity

None known

Other Information

Safety matches are a consumer product and regulated by the U.S. Consumer Products Safety Commission. Labeling/marketing requirements are outlined in 16 CFR 1202, *Safety Standard for Matches*.

Safety matches are shipped under DOT regulations, 49 CFR 173.186(c) and are marked per that regulation.

Interactions with Other Chemicals

No information available

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS No.	Weight-%
Match:		
Sulfur	7704-34-9	0.4%
Potassium chlorate	3811-04-9	4%
Striker Strip:		
Amorphous Red Phosphorous	7723-14-0	<1.0 %

4. FIRST AID MEASURES

First aid measures

Burns: Treat all thermal burns with appropriate first aid measures for degree of burn

Respiratory Distress: Remove to fresh air and seek medical attention for smoke inhalation

Eyes: Flush with fresh water for 15 minutes and seek medical attention.

Ingestion: While potassium chlorate is classified as a harmful substance, the quantity present in a single match is very low (typically 8 mg in a single match). With an LD50 of 1870 mg/kg of body weight, death may occur after ingestion of around

106 matches/pound of
body weight, i.e. over
2,125 matches for a

20 pound child. The quantities of matches are so large that the health risk is considered negligible.

Most important symptoms and effects, both acute and delayed

Most important symptoms and Effects Coughing and/ or wheezing from smoke inhalation. Difficulty in breathing.

Indication of any immediate medical attention and special treatment needed

Notes to Physician Treat symptomatically

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media

Water is the most effective extinguishant, but dry chemical, CO2, sand, earth, or regular foam can be used.

Unsuitable Extinguishing Media

Not known

Specific Hazards Arising from the Chemical

A large quantity of matches may burn rapidly with flare burning effect.

Uniform Fire Code FLAMMABLE SOLID: INORGANIC

Hazardous Combustion Products

Oxides of carbon, oxides of sulfur

Protective equipment and precautions for firefighters

Move containers from fire area if you can do it without risk

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal Precautions The likelihood of match head composition being released into the environment is low. If significant quantities of matches are released by breakage or spillage then remove all potential sources of ignition, salvage any undamaged product and wet down the remaining product before cleaning up.

7. HANDLING AND STORAGE

Precautions for safe handling

Handling In storage, matches give off no toxic fumes or flammable gases. Matches do not spontaneously catch fire although fires can occur if the product is mishandled. Handling and storage requirements are such as to minimize sources of ignition, and other highly flammable materials.

Conditions for safe storage, including any incompatibilities

Storage For safety, store in a cool, dry place, away from heat, open flames or sparks, or flammable materials.

Incompatible Products None known based on available information

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters

Exposure Guidelines No special measures are required when handling matches.
