SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW
Irritation of eyes, nose, and throat. Splashes in the eyes or on the skin will cause severe skin burns. Inhalation of acid vapors may be injurious to the lungs. Repeated or prolonged exposure to dilute solutions of acid may cause irritation of the skin.

POTENTIAL HEALTH EFFECTS

INHALATION:
Irritation of throat. Inhalation of acid vapors may be injurious to the lungs and with repeated inhalation chronic irritation/inflammation of nose, throat, and bronchial tubes.

SKIN:
Irritation and or burns by direct contact. Delayed onset contact dermatitis is also possible with chronic repeated exposure to both ampoule 1 and ampoule 3 chemicals.

EYES:
Chronic irritation of eyes.

INGESTION:
Severe irritation and ulceration of the gastrointestinal tract. Vomiting and diarrhea are also symptoms.

CARCINOGENICITY:

NTP? Yes - Acetaldehyde. IARC MONOGRAPHS? Yes - Acetaldehyde. OSHA REGULATED? No
CALIFORNIA, Prop.65? Yes CAS#75-07-0 (Acetaldehyde) are known carcinogens listed in the State of California.

ESIS? Yes CAS #75-07-0 EINECS #200-836-8 Acetaldehyde=Limited evidence of carcinogenic effect.

SECTION 4 - FIRST AID MEASURES

INHALATION:
Remove to fresh air, apply CPR if victim is unconscious, administer oxygen, seek immediate medical attention.

EYES:
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Seek immediate medical attention.

SKIN:
In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Seek medical attention.

INGESTION:
If swallowed, give plenty of water to dilute substances, do not induce vomiting; if conscious, give large quantities of water immediately. If vomiting occurs spontaneously, keep the head below the waist to avoid aspiration. Call a physician immediately.

## Section 5 - Fire Fighting Measures

**General Hazards:**
Acetaldehyde is flammable, and Sodium Nitroferricyanide will emit toxic gases when heated in a fire.

**Extinguishing Media:**
Use extinguishing media appropriate for surrounding fire.

**Fire Fighting Procedures:**
Under fire conditions wearing NIOSH/MSA or European EN-149 approved SCBA's or acid gas=organic vapor respirators is required.

**Unusual Fire and Explosion Hazards:**
Toxic fumes may be produced by heated product.

**Hazardous Combustion Products:**
Hydrogen Cyanide gas, carbon oxides, sodium oxide fumes.

## Section 6 - Accidental Release Measures

**Steps to be Taken in Case Material is Released or Spilled:**
Wear protective equipment; ventilate area; Add baking soda (sodium bicarbonate) to absorb material. Add water if necessary to form a slurry. Can use ODV part number 910 soda ash.

## Section 7 - Handling and Storage

**Precautions To Be Taken In Handling and Storage:**
Store and handle according to packaged instructions. Store in cool, well ventilated area. Keep away from reactive materials. Avoid breathing vapor and prevent vapor accumulation in enclosed areas.

## Section 8 - Exposure Controls / Personal Protection

**Personal Protection**
- **Respiratory Protection:** Not generally needed as kit is opened and used immediately in the field. For spills, an organic vapor respirator (OSHA/NIOSH or EU Approved) is advisable.
- **Protective Gloves:** Impervious gloves (neoprene, nitrile) required when any contact potential with contents exists.
- **Eye Protection:** Do not get in eyes, wear safety glasses with side shield splash protection or chemical goggles.
- **Other Protective Clothing or Equipment:** An eye wash fountain and safety shower should be readily available where the potential for contact exists.
- **Work / Hygienic Practices:** Wash thoroughly after handling. Be prepared to absorb any spill.

The ecological fate of the combined ingredients in this product is not completely understood, but Acetaldehyde has been implicated as potentially causing harm to the environment. Sodium Nitroferricyanide is considered harmful to aquatic organisms. Do not release product into sewers or bodies of water. Both Acetaldehyde and Sodium Nitroferricyanide are considered RCRA hazardous waste.

SECTION 13 - DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHOD:
Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts 261.3. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.
