#### Acute effects (acute toxicity, irritation and corrosivity):

- May be harmful if inhaled.

- Irritating to respiratory system.

## SECTION 12: Ecological information

### 12.1 Toxicity

- Aquatic toxicity:** The product contains materials that are harmful to the environment.

- 12.2 Persistence and degradability** A part of the components is biodegradable.

- 12.3 Bioaccumulative potential** Does not accumulate in organisms.

- 12.4 Mobility in soil** No further relevant information available.

#### Ecotoxicological effects:

- Remark:** After neutralization a reduction of the harming action may be recognized

#### Additional ecological information:

#### General notes:

At present there are no ecotoxicological assessments.

This statement was deduced from the properties of the single components.

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Must not reach sewage water or drainage ditch undiluted or unneutralized.

Rinse off of bigger amounts into drains or the aquatic environment may lead to decreased pH-values. A low pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

#### 12.5 Results of PBT and vPvB assessment

- PBT:** Not applicable.

- vPvB:** Not applicable.
