Material Safety Data Sheet

Coty US LLC
One Park Avenue
New York, NY 10016

Chemtrec Emergency Telephone 1(800) 424-9300
Chemtrec MSDS Group #: 1

Product: NYC Long-Wearing Nail Enamel 101A-149A   (DBP-FREE)
Supplier: Tevco Inc. South Plainfield, New Jersey, USA
Emergency Telephone: 1-908-754-7306

Section I

Hazardous Ingredients

Section II

Physical Data

Boiling Range: 171-228 Deg F
Vapor Pressure mm Hg @ 20°C: heavier than air
Evaporation Rate: (m-Butyl Acetate=1): >1.0
Specific Gravity or Bulk Index: 7.625 lb/gl
Coating VOC: 4.41 lb/gl
Material VOC: 4.43 lb/gl
Solubility in Water: Moderate
Appearance: Pigmented, viscous Liquid
Odor: Sweet Ester
Intensity: N/A

Section III

Fire and Explosion Data

Flash Point (Test Method): 24 Deg F TCC  Auto Ignition Temp: N/A
Flammability Limits in Air (% By Vol):
  Lower: 1.7  Upper: 12.7
Extinguishing Media: Water is the most effective fire extinguishing medium for nitrocellulose. It is recomended to be used in large volume. Dry chemical, CO₂ or a universal type foam could be used to extinguish small fires.
Special Fire Fighting Procedures: In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode. Water may be ineffective but can be used to cool containers exposed to heat or flame. Caution should be exercised when using water or foam as frothing may occur, especially if sprayed into containers of hot, burning liquid.
Product: NYC Long-Wearing Nail Enamel 101A-149A   (DBP-FREE)

Unusual Fire and Explosion Hazards: Handle as flammable liquid. Vapors form an explosive mix in air between the upper and lower explosive limits which can be ignited by many sources such as pilot lights, open flames, electrical motors and switches.

Section IV
Health Data
Toxicological Test Data: Result: N/A

Effects of Exposure:
Headache, Dizziness, Nausea, Staggering gait, Confusion, Unconsciousness

Potential Health Effects:
Acute: Irritation, Burning of the eyes, and skin, nervous system depression.
Chronic: Reports have associated repeated and prolonged overexposure to solvent with Permanent brain damage

Medical conditions generally aggravated by exposure

Ingestion: Do not ingest. Gastro-Intestinal Distress, Call a physician
Skin Contact: Repeated and prolonged contact expected to cause skin irritation with discomfort or dermatitis.
Eye Contact: May cause irritation or burning eyes upon direct contact.

First Aid Procedures:
Inhalation: Remove to fresh air, seek medical attention.
Eyes: Immediately flush eyes with copious amounts of water for at least 15 minutes. Contact a medical professional or local Poison Control Center.
Ingestion: Rinse mouth. Do not induce vomiting. Contact a medical professional or local Poison Control Center immediately. May act as laxative.
Clothing: Remove contaminated clothes. Rinse and then wash skin with water and soap.

Section V
Reactivity Data
Stability: stable
Conditions to Avoid: incompatibles, Flame, electric spark, static and heat.
Chemical Incompatibility: may react with Strong acids, alkalis or oxidizers
Hazardous Decomposition Products: Carbon dioxide, carbon monoxide, nitrous oxides. Under some conditions, methane, irritating aldehydes and carboxylic acids and hydrogen cyanide may be formed.
Hazardous Polymerization: not likely
Corrosive to Metal: N/A Oxidizer: N/A

Section VI
Special Protection
Respiratory Protection: For conditions of use where exposure to the dust or mist is apparent, a half-face dust/mist respirator may be worn. For emergencies or instances where the exposure levels are not known, use a full-face positive-pressure, air-supplied respirator. WARNING: Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.
Eye Protection: Use chemical safety goggles
Protective Clothing: Wear protective gloves and clean body-covering clothing
Ventilation: A system of local and/or general exhaust is recommended to keep employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, Industrial Ventilation, A Manual of Recommended Practices, most recent edition, for details.

Other: N/A

Section VII
Environmental Data

Environmental Toxicology Data: none

Spill and Leak Procedures: Remove all sources of ignition. Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 6. Absorb with vermiculite, dry sand, earth or similar material and place in a chemical waste container. Do not use combustible materials, such as sawdust. Do not flush to sewer.

Hazardous Substance Superfund: RQ (lbs):

Waste Disposal Method: dispose of in accordance with local, state, and federal regulations

Section VIII
Shipping Data for Consumer Packaging

D.O.T. Hazard Classification: UN1263 Class #3 Group II
Flammable Liquid Class 1B

Section IX
Additional Information

This Material Safety Data Sheet (MSDS) has been prepared in compliance with OSHA Hazard communication standard 29CFR 1910, 1200. To the best of our knowledge, the information contained herein is accurate. However, neither Del Laboratories, Inc. Nor any of its subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.
